

On Saturday 30th November, 2019, for 3rd semester students, Department of MCA has organized an industrial visit to UNIBIC Company. This visit was for the awareness of the students on the production and Automation process of the company. The industrial visit started at 10:30 am, Factory Manager has welcomed everyone to the UNIBIC cookies factory.

After the students donned a cap each they were shown the raw materials used to manufacture the cookies and taken to the mixing area, the oven, cocoa room, the cookie formation and the packaging section. Students watched the manufacturing process of two kinds of cookies –the chocolate and the butter cookies followed by a walk around the packing section.

He introduced the company and also mentioned that the company was started in 2004 which is an Australian originated company. Then he explained about the production levels of the Company where they are producing different varieties of cookies. After the introduction, we were taken to the production site and explained how the manufacturing process takes place. Different segment and layouts were briefly explained to the students. Coming to the packaging material part, there were three types namely primary – which has direct contact with the cookies and protects them, secondary – which protects the primary package, tertiary-which protects both. Assembling, Quality checking, warehousing, loading and unloading of the raw materials, and packaging were some of the major functions which was exposed to the students explaining all the minute details of the manufacturing process.
