The vast majority of Indians are getting upgrade through advanced and ads, brands are getting more touch point to achieve their objective gathering in this computerized time. More insights concerning discoveries are given this report.

# **CHAPTER - 1**

## **INTRODUCTION**

### **1.1 Introduction**

First of all, I had to hold a summer internship program for six weeks within the framework of the curriculum. My interest and curiosity is related to online or digital marketing, so I decided to work with a start-up company called "Outdoor Advertising Agency". I chose a start-up company because I could research more about digital marketing from the start. Because this is a fast-growing industry, the growth of digital marketing is enormous and is expected to grow in the future. Thanks to this summer internship I have studied all aspects of digital marketing (website listing, content creation, social networks). Marketing practices have dramatically changed with the growth of social networks, digital platforms and applications. Your prospects and current customers are working to communicate with you, and you can hear them faster and more personally than before. This changing environment presents marketers with new opportunities and challenges. Digital marketing makes it easy to fall behind. Digital marketing helps you identify the areas to improve and provide the tools you need to evaluate your organization's social media strategy and digital marketing. This is useful for small business employees who want to use new media for growth. Organizations can successfully implement inbound marketing strategies by posting content to the Internet in the form of external marketing including portals, podcasts, e-journals, online campaigns, social media marketing, search services and e-mail marketing, and RSS (Really Simple Syndication).

## **1.2 Industry profile**

An advertising agency is a company that deals with the creation, planning and processing as well as with other forms of sales promotion and distribution of its customers. In general, an agency can be an internal department that does not rely on customers and provides an external view of the sales of their products and services by customers. Agencies can manage all marketing and branding strategies and promotions for their clients. Advertising agencies can rent TV ads, radio ads, online ads, outdoor advertising, mobile marketing and other advertising productions.

The primary promoting office was William Taylor in 1786. Another Advertising office begun by James 'Jem' White in 1800 at Fleet Street. White Bull Holmes, an enrollment Advertising organization, they left business in the late 1980s. In 1812 George Reynell, an officer at the London Gazette, set up another of early promoting organization. This remained a privately-run company until 1993, as Reynell and child. what's more, is presently part of the TMP overall organization, another office that exchanged as of not long ago, was established by Charles Barker, and the firm he set up exchanged as Barker until 2009. Volney B. Palmer began the primary American Advertising office in 1850 in Philadelphia. This office put promotions in different papers.

### **Advertising Agencies in India**

Indian Advertising begins with the peddlers getting out their products directly from the days when urban communities and markets initially started. Solid Advertising history starts with ordered promoting. Advertisements show up without precedent for print in Hickey's Bengal Gazette, India's first paper (week by week). To 'publicize' implied only to 'advise' until the finish of the eighteenth century, and the early papers and periodicals declared births, passing's, landings of boats from England, clearance of family unit furniture, and so on certain diaries like the Bengal Journal (first distributed in 1785) even offered to print government promotions free.

The first page of most such diaries conveyed just commercials. Be that as it may, after a short time powerful duplicate started to supplant insignificant data. This is clear from the presence of turns of phrase, for example, 'better than anything of the sort until now imported' and 'justified to the main quality'. Limits and exceptional administrations likewise started to be offered by the start of the nineteenth century.

There has been a long convention of Advertising in India since the main paper distributed in India in the nineteenth century conveyed promoting. The primary promoting office was set up in 1905, B. Datram and organization, trailed by India-promoting organization in 1907, Calcutta Advertising Agency in 1909, S.H.Bensen in 1928, J, Walter Thompson Associates through its Indian partners, Hindustan Thompson relates in 1929, Lintas in 1939 and McCann Erikson Associates in 1956.

## **CHAPTER - 2**

### **CONCEPTUAL BACKGROUND AND LITERATURE REVIEW**

#### **2.1 Conceptual background:**

##### **Digital Marketing:**

Digital marketing can be characterized as the way toward advancing of brands utilizing computerized circulation channels including web, portable and other intuitive channels. The fundamental preferred standpoint in this type of promoting lies in its minimal effort display. Computerized Marketing can be ordered into Pull and Push showcasing. Force computerized promoting advancements include the client searching out and straightforwardly get the substance by means of web seeks. Site/web journals and spilling media are genuine instances of this. In every one of these precedents, clients have a particular connect to see the substance.

##### **Kinds of digital marketing / Digital Marketing Networks**

###### **✓ Search Engine Optimization(SEO):**

Site design improvement (SEO) is the way toward influencing the perceivability of a site or a website page in a web crawler's "normal or un-paid ("natural") list items. Website design enhancement may target various types of pursuit, including picture seek, neighbourhood look, video seek, scholastic inquiry, news hunt and industry-explicit vertical web crawlers. As an Internet showcasing methodology, SEO thinks about how web crawlers work, what individuals scan for, the genuine pursuit terms or watchwords composed into web search tools and which web search tools are favoured by their focused on group of onlookers.

###### **✓ Social bookmarking:**

Basically, a social bookmark is a connection that individuals post to social sites for others to see since they think that it's fascinating, important or cool. As it were, social bookmarks are much the same as the bookmarks you as of now have on your private PC. The contrast between the two is that social bookmarks are spared to the web where they can be effectively shared while private bookmarks are spared to your own program.

✓ **SEM Search engine marketing:**

Search engine marketing (SEM) is a type of Internet advertising that includes the advancement of sites by expanding their perceivability in web index results pages through enhancement and promoting SEM may utilize site design improvement (SEO), which modifies or revises site substance to accomplish a higher positioning in web crawler results pages, or use pay per click postings.

✓ **Facebook Market**

Facebook is the world's most prevalent interpersonal organization for the two organizations and people. With more than one billion clients, your companions and fans are likely as of now utilizing the stage and you ought to be as well. Truth be told, individuals are 51% bound to make a buy in the wake of "preferring" a brand on Facebook. Face book showcasing requires a decent judgment skills and one of a kind reasoning to make the crusade compelling.

✓ **Twitter marketing:**

Twitters adaptable, constant stage enables you to get innovative and drive results in the meantime. Regardless of whether you're hoping to drive deals, increment brand mindfulness or dispatch an item. Twitter advertising isn't much prominent than face book yet at the same time it affects gathering of people.

✓ **Linked In Marketing:**

LinkedIn enables organizations to make proficient profiles for themselves just as their business to network and meet others. Using gadgets, individuals can advance their different person to person communication exercises, for example, Twitter stream or blog passages of their item pages, onto their LinkedIn profile page. LinkedIn gives its individuals the chance to create potential customers and colleagues.

✓ **Pinterest:**

It is a visual revelation interpersonal organization. It is a method for sharing pictures of anything, from design to pets to pot plants. You can make your own online stick sheets to suits any subject and impart it to similarly invested individuals. Pinterest totally rotates around the reason of being imaginative and visual. 70% clients are female and matured somewhere in the range of 25 and 44. So on the off chance that you are focusing on ladies Pinterest is the correct stage. Pinterest is currently one of the main 10 person to person communication destinations followed by Hit savvy.

✓ **Instagram:**

Instagram, the new progressive photograph sharing project, making it simpler than at any other time to impart your best pictures to the world. The internet based life program enable you to transfer, include computerized channels, and after that post your photos on your Instagram-feed, just as other person to person communication destinations. You can associate your Instagram account with Facebook, Twitter, Flickr, Foursquare and your email account. This makes it simple to share your photos on numerous stages at the same time.

✓ **Google+:**

Google has depicted Google+ as a "social layer" that upgrades a considerable lot of its online properties, and that it isn't just a long range interpersonal communication site, yet in addition an initiation apparatus that partners web-content legitimately with its proprietor/creator. It is the second-biggest interpersonal interaction site on the planet after Facebook.

| Neutral          | 2                 | 10%        |
| Not very happy   | 2                 | 10%        |
| Not at all happy | 1                 | 5%         |
| Total            | 20                | 100%       |

#### 4.20 Chart showing ratings of Email marketing service

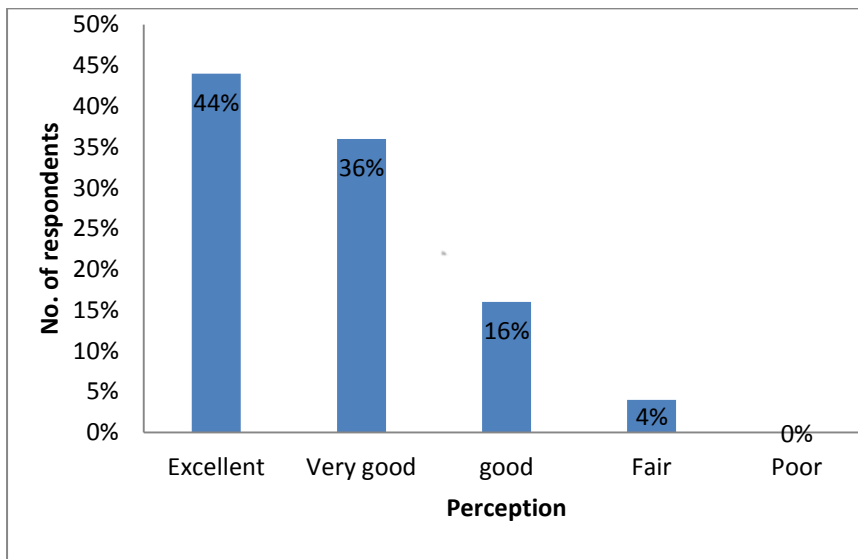

#### Interpretation:

From above table it is observed that 45% of clients are very happy regarding Email marketing service, 30% of respondents are somewhat happy regarding Email marketing service, 10% of respondents are neutral regarding Email marketing service, 10% of respondent are not happy regarding Email marketing service and 5% of respondents are not at all happy about Email marketing service respectively.

#### 4.21 Table showing rating of service regards digital marketing

| Particular  | No of Respondents | Percentage |
|-------------|-------------------|------------|
| a)Excellent | 22                | 44%        |
| b)Very good | 18                | 36%        |
| c)Good      | 8                 | 16%        |
| d)Fair      | 2                 | 4%         |
| e)Poor      | 0                 | 0%         |
| Total       | 50                | 100%       |

#### 4.21 Chart showing rating of service regards digital marketing

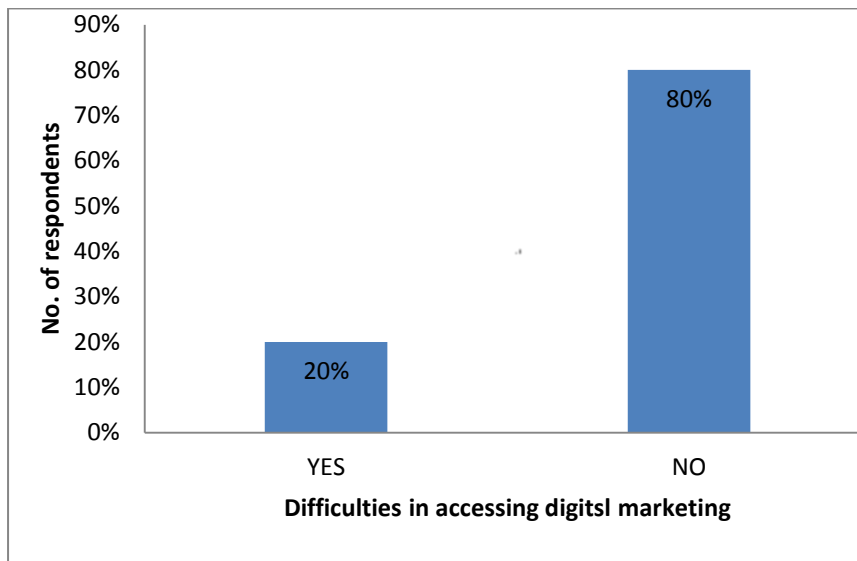

#### Interpretation:

From above table it is observed that 44% of clients are gave excellent rating about digital marketing service, 36% of respondents are gave very good, 16% of respondents are gave good rating, 4% of respondent gave rating of fair and No one respondent gave poor rating of digital marketing respectively.

#### 4.22 Table showing difficulties in accessing digital marketing service

| Particular | No of Respondents | Percentage(%) |
|------------|-------------------|---------------|
| a)Yes      | 10                | 20%           |
| b)No       | 40                | 80%           |
| Total      | 50                | 100%          |

#### 4.22 Chart showing difficulties in accessing digital marketing service

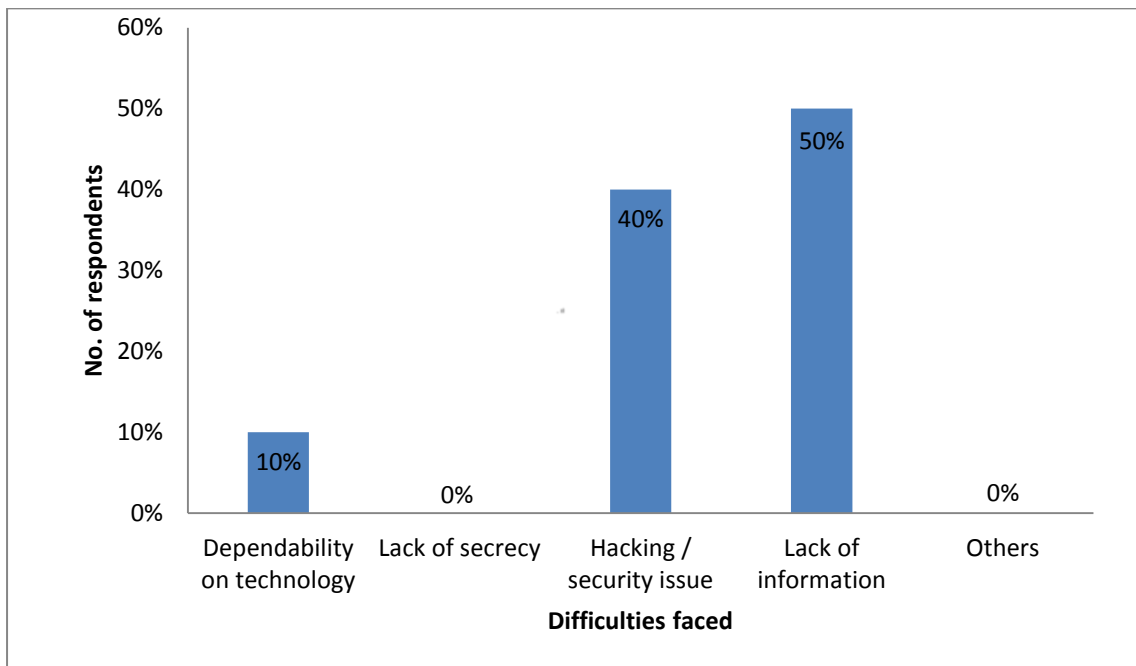

#### Interpretation:

From above table it is observed that 80% of clients are not facing any difficulties in accessing digital marketing service and, 20% of respondents are facing difficulties in accessing digital marketing service

#### 4.23 Table showing difficulties faced by respondents regards to digital marketing

| Particular                  | No of Respondents | Percentage |
|-----------------------------|-------------------|------------|
| Dependability on technology | 1                 | 10%        |
| Lack of secrecy             | 0                 | 0%         |
| Hacking / security issue    | 4                 | 40%        |
| Lack of information         | 5                 | 50%        |
| Others                      | 0                 | 0%         |
| Total                       | 10                | 100%       |

#### 4.23 Chart showing difficulties faced by respondents regards to digital marketing

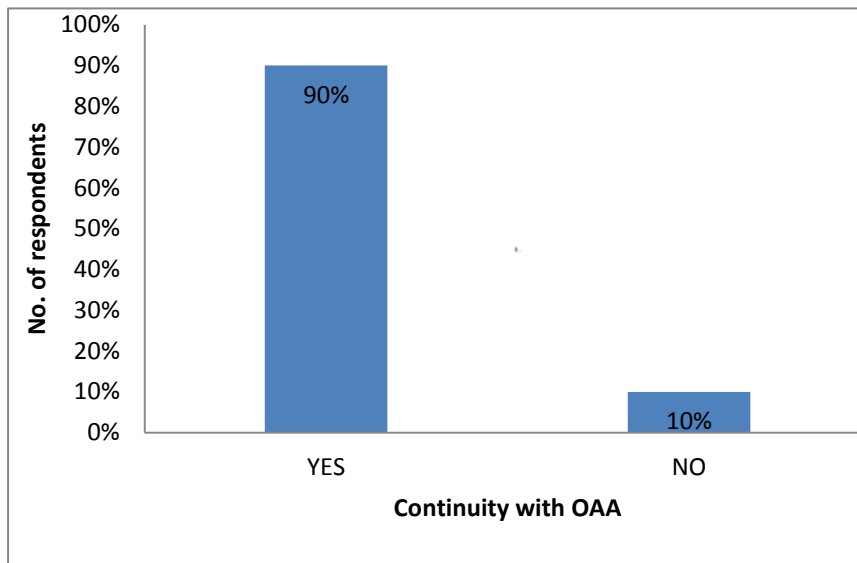

#### Interpretation:

From above table it is observed that 50% of clients are facing difficulties of lack of information about digital marketing service, 40% of respondents are facing difficulties regarding security issues, 10% of respondents are facing difficulties of dependability on technology respectively.

#### 4.24 Table showing continuity of service with OAA

| Particular | No of Respondents | Percentage(%) |
|------------|-------------------|---------------|
| a)Yes      | 45                | 90%           |
| b)No       | 5                 | 10%           |
| Total      | 50                | 100%          |

#### 4.24 Chart showing continuity of service with OAA

#### Interpretation:

From above table it is observed that 90% of clients are happy to continue the service with OAA and 10% of respondents are not happy to continue the service with OAA.

## Hypothesis (Results obtained by the using statistical tools)

### 4.25 Table showing descriptive statistics of hypothesis

| Descriptive Statistics      |        |                |    |
|-----------------------------|--------|----------------|----|
|                             | Mean   | Std. Deviation | N  |
| Area located                | 1.5000 | .64681         | 50 |
| Usage of DM                 | 4.2000 | .85714         | 50 |
| rating of srvice regards DM | 4.2400 | .79693         | 50 |

### 4.26 Table showing correlations of the hypothesis

| Correlations                 |                        |              |             |                              |
|------------------------------|------------------------|--------------|-------------|------------------------------|
|                              |                        | Area located | Usage of DM | rating of service regards DM |
| Area located                 | Pearson Correlation    | 1            | -.258       | -.040                        |
|                              | Significance(2-tailed) |              | .071        | .785                         |
|                              | N                      | 50           | 50          | 50                           |
| Usage of DM                  | Pearson correlation    | -.258        | 1           | -.161                        |
|                              | Significance(2-tailed) | .071         |             | .263                         |
|                              | N                      | 50           | 50          | 50                           |
| rating of service regards DM | Pearson correlation    | -.040        | -.161       | 1                            |
|                              | Significance(2-tailed) | .785         | .263        |                              |
|                              | N                      | 50           | 50          | 50                           |

#### Interpretation:

From the above results it is observed that correlation between areas where clients located with the use of the digital marketing for their business is 0.071 and the correlation between area located and rating of digital marketing for their business is 0.785, hence the significance value is greater than 0.05 so we can arrive at a conclusion that both the factors are insignificant in nature, hence null hypothesis is confirmed. So there is no significant difference between location and use of digital marketing for their business.

#### 4.27 Table showing descriptive statistics of hypothesis

| Descriptive Statistics           |        |                |    |
|----------------------------------|--------|----------------|----|
|                                  | Mean   | Std. Deviation | N  |
| Age group                        | 4.1800 | 1.64986        | 50 |
| Usage of Social media marketing  | 1.1600 | .37033         | 50 |
| Rating of social media marketing | 3.6400 | 1.84899        | 50 |

#### 4.28 Table showing correlations of the hypothesis

| Correlations                     |                        |                    |                                 |                                  |
|----------------------------------|------------------------|--------------------|---------------------------------|----------------------------------|
|                                  |                        | Age group          | Usage of Social media marketing | Rating of social media marketing |
| Age group                        | Pearson Correlation    | 1                  | -.315 <sup>*</sup>              | .396 <sup>**</sup>               |
|                                  | Significance(2-tailed) |                    | .026                            | .004                             |
|                                  | N                      | 50                 | 50                              | 50                               |
| Usage of Social media marketing  | Pearson correlation    | -.315 <sup>*</sup> | 1                               | -.868 <sup>**</sup>              |
|                                  | Significance(2-tailed) | .026               |                                 | .000                             |
|                                  | N                      | 50                 | 50                              | 50                               |
| Rating of social media marketing | Pearson correlation    | .396 <sup>**</sup> | -.868 <sup>**</sup>             | 1                                |
|                                  | Significance(2-tailed) | .004               | .000                            |                                  |
|                                  | N                      | 50                 | 50                              | 50                               |

#### Interpretation:

From the above results it is observed that the correlation between Age group with usage of social media marketing for their business is 0.026 and the correlation between age group and rating of social media marketing for their business is 0.004, hence the significance value is less than 0.05 so we can arrive at a conclusion that both the factors are significant in nature, hence alternative hypothesis is confirmed. So there is a significant difference between age group of people who prefer social media for their business.

## CHAPTER - 5

### FINDINGS, SUGGESTIONS AND CONCLUSION

#### 5.1 Findings:

- ✓ From the analysis can be stated that male category of the respondents are 68%.
- ✓ It observed 52% of the respondents are belongs to 21 to 30 years age group
- ✓ It is found that 58% of the respondents are belongs to urban area and they having their business operation in urban area.

## **5.2 Suggestions**

- ✓ There should be a separate team which consisting experts in digital advertising which will make advertisement effective and better result can be expected.
- ✓ We found that there is great demand for digital advertisement; hence competent human resource has to be hired and trained.
- ✓ There is the need for the company to promote them in the field of advertisement more effectively.

## **5.3 Conclusion**

The success of this internship shows that future marketing is in the hands digital. Digital marketing includes not only ads on the portal, but also integrated services and integrated channels. Marketers want to leverage these components to reach audiences and develop brands. Marketers in the digital age are not the guardians of the brand, and people connected via digital platforms are gatekeepers.

Brands want to expand their position on the digital platform. Indeed, customers prefer digital media more than others. This customer has many people looking for information and the digital media is the only two-way communication platform between customers. Digital media is the best platform for turning a product into a brand. Indeed, it is less expensive and offers many points of contact to marketers. Brands can interact effectively with the public via digital platforms. Digital media is not only attractive and brands can develop or retain existing customers. The digital platform helps to increase the impact of brand recalls on target groups.

The importance of the digital presence increases that of digital agencies, which generate revenue through digital advertising, raise awareness of digital marketing, earn a lot of money for digital agencies and earn more with micro-investments. Honestly, this project report is very useful for marketers to understand digital marketing and plan their future strategies.
