

Fourth Semester B.Arch. Degree Examination, Jan./Feb. 2021
Structures - IV

Time: 3 hrs.

Max. Marks: 100

Note: Answer FIVE full questions.

- 1 a. Distinguish between determinate and indeterminate structures with examples. (06 Marks)
 b. Determine degree of redundancy for the following cases: (Ref Fig.Q.1(b) (i) (ii) (iii)). (04 Marks)

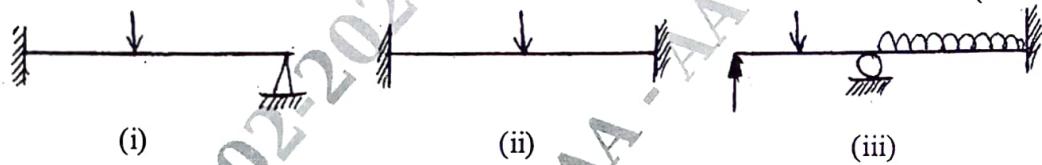

Fig.Q.1(b)

- c. Derive fixed end moments for the fixed beam with UDL throughout. (10 Marks)
- 2 a. Determine the degree of indeterminacy for propped cantilever beam and fixed beam. (04 Marks)
 b. Analyse the fixed beam shown in Fig.Q.2(b). Draw SFD and BMD. (16 Marks)

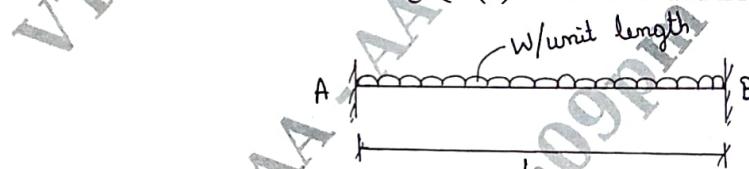

Fig.Q.2(b)

- 3 Analyze the beam shown in Fig.Q.3. Draw BMD and SFD. (20 Marks)

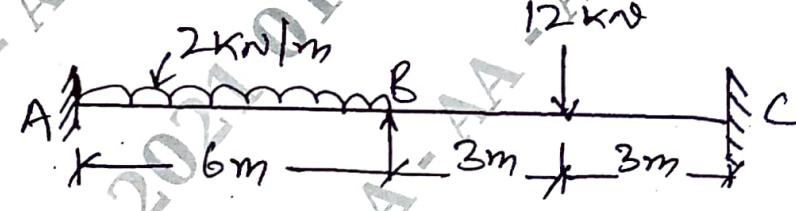

Fig.Q.3

- 4 Analyse the continuous beam shown in Fig.Q.4 by three moment theorem. Draw SFD and BMD. (20 Marks)

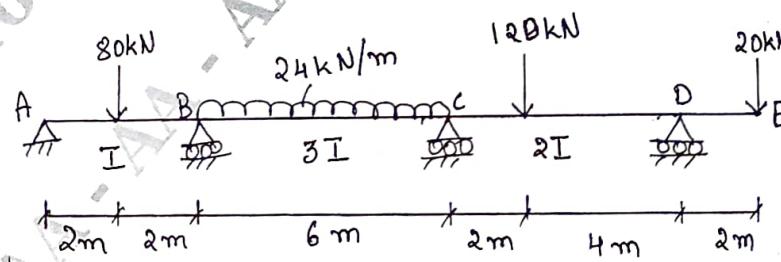

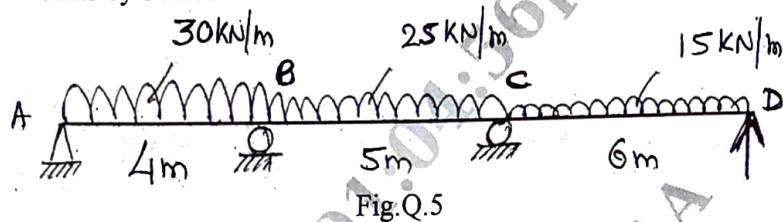

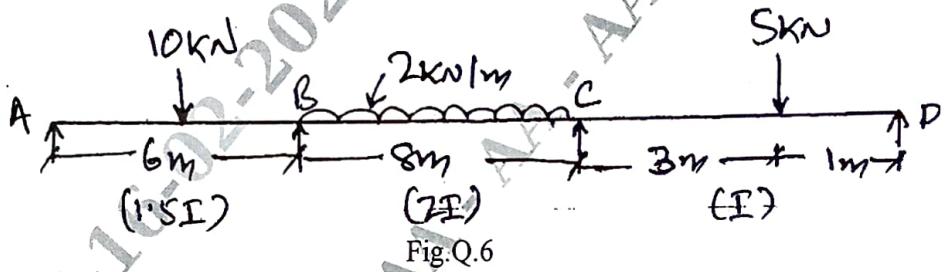

Fig.Q.4

Important Note : 1. On completing your answers, compulsorily draw diagonal cross lines on the remaining blank pages.
 2. Any revealing of identification, appeal to evaluator and /or equations written eg, $42+8=50$, will be treated as malpractice.

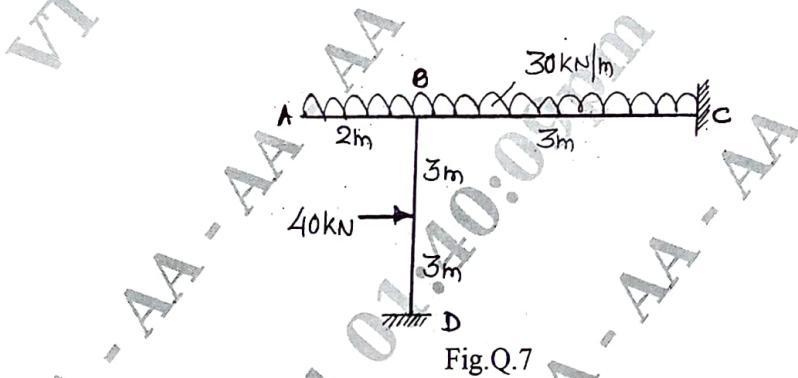

- 5 Analyse the continuous beam shown in Fig.Q.5 by Clapeyron's theorem of three moments. The support B sinks by 8 mm. Draw BMD and SFD. Take $EI = 8000 \text{ KN-m}^2$. (20 Marks)

- 6 Analyze the continuous beam shown in Fig.Q.6 by moment distribution method. Draw BMD. (20 Marks)

- 7 Analyse the non sway frame shown in Fig.Q.7 by M.D. method. draw only BMD. (20 Marks)

- 8 Analyse the portal frame by moment distribution method shown in Fig.Q.8. Draw BMD. (20 Marks)

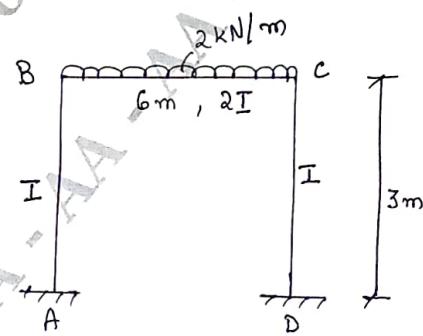

Fig.Q.8
