ABSTRACT

Title- “A Study To Assess The Effectiveness Of Structured Teaching Programme On Knowledge Regarding Dental Caries Among School Going Children, Bengaluru.”

Dental caries is the major health problem in most industrialized countries affecting 60-90% of school children and the vast majority of adult. Dental caries is a multi-factor disease and preventable health problem which interfere with normal nutrition, speech, self-esteem and daily routine activities.

Keywords:

Dental caries; School children; Structured teaching programme.

Aims and objectives:

- 1.To assess the knowledge of oral hygiene among the subjects.
- 2.To assess the effectiveness of Structured teaching programme among school going children by conducting, pre-test, Structured teaching programme, post-test.
- 3.To assess the effectiveness of role playing, health education video playing in improving dental hygiene practice skill among primary school children.

Method:

Purposive sampling technique.

TABLE OF CONTENT

Chapter No	Chapter title	Page No
1	Introduction	1-3
2	Need for the study	4
3	Objectives	5-7
4	Review of literature	8-12
5	Methodology	13-18
6	Results	19-27
7	Discussion	28-29
8	Conclusion	30-33
9	Summary	34-36
10	Bibliography	37-39
11	Annexure	40-53

LIST OF TABLES

Table No	Table Name	Page No
1	Frequency and percentage according to gender of respondent	21
2	Frequency and percentage distribution of respondent according to their previous knowledge	22
3	Frequency and percentage distribution of respondent according to history of tooth ache or dental caries	23
4	Frequency and percentage distribution of respondent according to age of respondent	24
5	Mean, mean percentage and standard deviation for pretest knowledge of respondent on knowledge regarding dental caries	25
6	Mean, mean percentage and standard deviation for post- test knowledge of respondent on knowledge regarding dental caries	25
7	Comparison between pretest and post-test result	26
8	Association of post-test level knowledge score of subjects with demographic variables	27
9	Comparison of pretest and post-test knowledge regarding dental caries	27

LIST OF FIGURES

FIGURE NO	FIGURE TITLES	PAGE NO
1	Schematic Representation of Methodology	18
2	Frequency and percentage distribution of respondent according to their gender	21
3	Percentage distribution of respondent according to their previous information regarding dental caries	22
4	Percentage distribution of respondent according to history of toothache/dental caries	23
5	Frequency and percentage distribution of respondent according to age group	24
6	Comparison of pretest and post-test mean, mean percentage and standard deviation	26

LIST OF ANNEXURES

Annexure No	Annexure Title	Page No
A	Letter seeking permission to conduct study	41
B	Consent Form	42
C	Pretest and post-test questionnaire	43-45
D	Answer key with score	46
E	Master sheet of the respondents	47
F	Lesson Plan	48-52
