What is the importance of Typography in graphic design?

Typography in graphic design can strongly affect how people react to a design. Careful selection and consistent use of a chosen typeface can be just as important as the use of graphics, color and images in creating and solidifying a professional brand.

5 REASONS WHY TYPOGRAPHY MUST BE POWERFUL?

1. It attracts and holds the audience's attention. Used correctly, typography can convey a certain mood or feeling. The audience needs to understand what message you are trying to send and be interested in it.

2. It is reader friendly.

Using fonts that are clean and easy to read are key to any promote any brand. If fonts are too small or cramped together, your promotion will be immediately ignored.

5 REASONS WHY TYPOGRAPHY MUST BE POWERFUL?

3. It establishes an information hierarchy. By using different font sizes and types of font, the audience can determine the most important points of your promotion just by looking at it. This makes it easier for your audience to follow along and pay more attention to your promotion.

4. It helps to create harmony. Repetition of the same font in your promotion creates continuity and simplicity. Keeping your fonts aligned and in proportion synchronizes your promotion keeps it uncluttered.

5 REASONS WHY TYPOGRAPHY MUST BE POWERFUL?

5. It creates and builds recognition. The fonts you use in your presentation are the visuals that your audience will remember most. You want your audience to be able to recognize your company's brand at any place or time. Typography marks your company and is the one thing the viewer will identify with time and time again

4 IMPORTANT TECHNIQUES APPLIED IN TYPOGRAPHY FOR EFFECTIVE BRAND PROMOTION AND READABILITY?

- 1 HIERARCHY
- 2 LEADING
- 3 TRACKING
- 4 KERNING

ing
ght

HIERARCHY

When designing anything, it's important to figure out
How you're going to structure the elements?

- What is the first thing the viewer should look at?
- How bold or big should the headline be?
- Are the images and text competing?
- Is there one unified design?

LEADING

Leading (or letter spacing) is the space between lines of type.

Increasing leading by adding more white space can reduce the pace of reading text.

Decreasing leading by making the text appear more compact can increase the pace of the reader.

ing
right

Kerning
Sans-serif
Xner

LEADING

examples

Tight leading (12pt type, 10pt leading)

The vertical distance between adjacent baselines in a paragraph of text is known as leading. The vertical distance between adjacent baselines in a paragraph of text is known as leading.

Normal leading (12pt type, 14pt leading)

The vertical distance between adjacent baselines in a paragraph of text is known as leading. The vertical distance between adjacent baselines in a paragraph of text is known as leading.

Loose leading (12pt type, 18pt leading)

The vertical distance between adjacent baselines in a paragraph of text is known as leading. The vertical distance between adjacent baselines in a paragraph of text is known as leading.

ing
right

TRACKING

Tracking is the space between characters in a piece of text and can be described as being “loose” or “tight.” Loose tracking is when the letters have a larger distance between them. Tight tracking is when the letters are closer. Each time you set type, you should be looking at the overall picture.

KERNING

Kerning is the art of adjusting the space between characters so that the eye can flow easily across the copy without being distracted by discrepancies. Typography influences how readers process information, and the most successful typography also engages the consumer.

Note: Good typography is never unnoticed.
