Easy Travel is an e-commerce startup looking for potential customers for its market expansion but has limited resources for primary research. The firm accesses the secondary data on domestic tourism industry released by Government of India. The secondary data offers a viable, cost effective solution to find the potential customers. The questionnaire used gives the nature of the available data. Easy Travels needs to generate more insights to compete in the market.

Ouestions:

- Examine the advantages and disadvantages of Secondary Research.
- Evaluate the type of sample design to be implemented for this ecommerce startup. (05 Marks)
- Develop a questionnaire for Easy Travels to extract relevant information so as to generate (10 Marks) the required insights to compete in the market.
