ABSTRACT

Title: "A STUDY TO ASSESS THE KNOWLEDGE ON CARE OF CAESAREAN WOUND INFECTION AMONG POSTNATAL MOTHERS IN A SELECTED HOSPITAL, BANGALORE".

Background:

1. To Assess the knowledge on care of caesarean wound infection among postnatal mothers.

Method: Descriptive approach was used to collect data from 30 subjects selected by purposive sampling technique through non probability sampling approach consisting 2 sections.

Section A: Demographic variable consisting of 7 items

Section B: Structured questionnaire for assessing knowledge level consisting of 20 items

Result: 1. less than 50 has got inadequate knowledge is 20%.

2. (50 – 75) has got moderate knowledge is 50%.

3. More than 75% has got adequate knowledge is 30%.

TABLE OF CONTENT

SLNO	CHAPTER	PAGE NO.
1.	INTRODUCTION	1-5
2	NEED OF STUDY	6-10
2.	OBJECTIVES	11-12
3.	REVIEW OF LITERATURE	13-16
4.	METHODOLOGY	17-23
5.	RESULTS	24-39
6.	DISCUSSION	40-42
7.	CONCLUSION	43-44
8.	SUMMARY	45-46
9.	BIBLOGRAPHY	47-49
10.	ANNEXURES	50-61

LIST OF TABLE

TABLE NO.	TITLE	PAGE NO.
1	Frequency and percentage distribution of respondents according to their age group	25-26
2	Frequency and percentage distribution of respondents according to their religion	27
3	Frequency and percentage distribution of respondents according to economic status	28
4	Frequency and percentage distribution of respondents according to educational status.	29
5	Frequency and percentage distribution of respondents according to occupation.	30
6	Frequency and percentage distribution of respondents according to type of family.	31
7	Frequency and percentage distribution of respondents according to sources of information.	32
8	Classification of response on the knowledge level regarding the care of caesarean wound infection.	33
9	Aspect wise knowledge distribution of responds on knowledge releated to wound infection.	34
10	Item wise knowledge of undergraduate students regarding caesarean wound infection	35-36

LIST OF FIGURES

FIGURE NO	TITLE	PAGE NO.
1	Schematic representation of research methodology.	23
2	A pie chart shows percentage distribution of respondents according to their age group.	26
3	A pie chart shows frequency and distribution of respondents according to their religion.	27
4	A pie chart shows frequency and distribution of respondents according to their economic status.	28
5	A pie chart shows frequency and percentage distribution of respondents according to educational status.	29
6	A graph shows frequency and percentage distribution of respondents according to occupation status.	30
7	A pie chart shows frequency and percentage distribution of respondents according to type of family.	31
8	A graph shows frequency and percentage distribution of respondents according to sources of information.	32
9	A graph shows frequency and percentage distribution of respondents according knowledge level.	33
10	A pie chart shows aspect wise knowledge distribution of respondents on knowledge related of wound infection.	34
