ABSTRACT

Title:"A DESCRIPTIVE STUDY TO ASSESS THE KNOWLEDGE REGARDING OPPORTUNISTIC INFECTION ON HIV & TB AMONG STUDENT NURSES AT SELECTED NURSING COLLEGE, BANGALORE."

Background:

Objective

- To assess the knowledge on opportunistic infection of HIV TB among student nurses.

Method: Descriptive approach was used to collect data from 30 subjects. Selected by purposive sampling technique through non probability sampling approach consisting 2 sections.

Section A: Demographic Performance consisting of 8 items

Section B: Structured questionnaire for assessing knowledge level consisting of 30 items

Result: Majority 82.5% of respondents had knowledge about TB. 75.61% of respondents were aware of HIV. 67.7% of respondents were aware about opportunistic infections.

Overall mean percentage of knowledge score is 75.1%.
