ACKNOWLEDGEMENT

First and foremost, I offer my deepest gratitude to my guide **ANJANA BIRADAR** who has supported me throughout my thesis with her patience and knowledge, giving me the room to work in my own ways. I thank her for the excellent guidance, care, patience and for providing me with an excellent atmosphere for conducting this research.

I would like to express my sincere appreciation and gratitude to **Dean**, AS Arch for giving us the inspiration and support that was required.

I also show my gratitude to **Ar. Priya Joseph**, thesis co-ordinator for her steadfast encouragement for her valuable insights.

I would like to thank our library staff for providing me all the valuable information and co-operation in the completion of my thesis successfully.

Last but not least I thank my parents **VJ SEBASTIAN** and **REENA SEBASTIAN**, family and friends for their constant support and understanding during the course of this project.

ABSTRACT

Protecting the wildlife is essential for the survival of the physical environment and ultimately humanity. Successful conservation and education however, does much more than simply ensure survival: It offers an opportunity for growth, development, and improved health in future. Wild animals are part of the complicated interconnected web of life on which we all depend.

The aim of this project is, as the survival of many wildlife species is threatened due to a widespread lack of awareness of the importance of protecting wildlife and habitat, the centre will be to support and promote the conservation of wild animals in their natural habitat

Limitation of this wildlife centre is, as it is proposed in Kerala, the animals rescued and conserved will be limited to the particular state. Project location also includes limitations as it should not be close to a town or heavily populated area. The Centre will provide environmental education for a broad range of visitors as well as school and university groups. The Centre will conduct conservation and environmental awareness programmes that will help provide environmental protection.

Design is being executed in Wayanad, Kerala, place rich in biodiversity. Includes a hospital, visitor centre, library, institute and hostels for students and people In and around. Design follows the Kerala form of architecture which contains the features as central courtyard, verandas, tile roof, brick walls, pillars etc. Follows the climatic conditions of Kerala. Buildings are surrounded by thick vegetation and gives a peaceful and soothing atmosphere for students and people , gives a different feel in the whole centre.
