## First Semester MCA Degree Examination, Jan./Feb. 2023 Data Structures

Time: 3 hrs.

Max. Marks: 100

Note: 1. Answer any FIVE full questions, choosing ONE full question from each module.
2. M: Marks, L: Bloom's level, C: Course outcomes.

		Module – 1	M	L	C
Q.1	a.	Define data structures. Explain classification of data structures with example.	10	L2	CO1
	b.	Explain the two types of representation of a stack with neat diagram.	4	L2	CO1
	c.	Write an algorithm to convert a valid infix expression into postfix expression.	6	L3	CO2
		OR			
Q.2	a.	What is stack? Explain the stack operations push and POP with C functions.	8	L3	CO1
	b.	Convert the following expression from infix to postfix: i) $(A + B) * C - D \wedge E$ ii) $A + B / (D + E) * F \wedge G$	4	L3	CO2
	c.	Write an algorithm to evaluate post fix expression using stack.  Module – 2	8	L3	CO2
Q.3	0	What is recursion? Write C program to find GCD of 3 Nos using recursion.	0	Т 2	002
Q.S	a.		8	L3	CO2
	b.	What is Queue? Write C program to implement queue operations Enqueue, Dequeue and display using array as datastructure.	12	L3	CO3
0.4		OR		Y 0	000
Q.4	a.	Explain queue varients with neat diagram.	4	L2	CO3
	b.	Implement circular queue operations Insert, Remove and Display using C program.	10	L3	CO3
	c.	Write a C program to find factorial of a number using recursion.	6	L3	CO3
		Module – 3			
Q.5	a.	What is DMA? Discuss different types of memory management functions in C.	10	L2	CO2
	b.	Write functions in C to demonstrate the following operations on singly linked list: i) Insert at front ii) Remove node from front iii) Insert node at end.	10	L3	CO3

b. Write a note on header nodes in linked list with neat diagram.  c. Write C code snippet to demonstrate application of linked list as stack for implementing push and POP operations.  Module - 4  Q.7 a. What is binary tree? Write note on threaded binary tree with neat diagram.  b. Construct the binary search tree for the data 27, 5, 36, 47, 19, 250, 21, 44, 60. Perform preorder, Inorder and Postorder traversal for the constructed BST.  OR  Q.8 a. Write a note on Array and linked representation of binary tree.  b. Write recursive function for the following operations on binary search tree: i) Insert key in BST ii) Search key in BST.  Module - 5  Q.9 a. Define DFS and BFS. Obtain the difference between both. Traverse the following graph using DFS and BFS. Assume the source node is B.  G.9 a. Define DFS and BFS. Obtain the difference between both. Traverse the following graph using DFS and BFS. Assume the source node is B.  OR  Q.10 a. What is radix sort? Sort the following numbers using radix sort and show the table of various passes of radix sort. List: 326, 453, 608, 835, 751, 435, 704, 690.  OR  Q.10 a. What is a graph? Explain array representation of graph with neat diagram.  4 L2  b. What is hash collision? Explain various methods for resolving hash 6 L2						
Define DFS and BFS. Obtain the difference between both. Traverse the following graph using DFS and BFS. Assume the source node is B.    Define DFS and BFS. Obtain the difference between both. Traverse the following graph using DFS and BFS. Assume the source node is B.			OR			
C. Write C code snippet to demonstrate application of linked list as stack for implementing push and POP operations.    Module - 4	Q.6	a.		6	L2	CO3
write code simplementing push and POP operations.    Module - 4		b.	Write a note on header nodes in linked list with neat diagram.	4	L2	CO3
a. What is binary tree? Write note on threaded binary tree with neat diagram.  b. Construct the binary search tree for the data 27, 5, 36, 47, 19, 250, 21, 44, 6. Perform preorder, Inorder and Postorder traversal for the constructed BST.  OR  Q.8 a. Write a note on Array and linked representation of binary tree.  b. Write recursive function for the following operations on binary search tree: i) Insert key in BST ii) Search key in BST.  Module − 5  Q.9 a. Define DFS and BFS. Obtain the difference between both. Traverse the following graph using DFS and BFS. Assume the source node is B.  Define DFS and BFS. Obtain the difference between both. Traverse the following graph using DFS and BFS. Assume the source node is B.  Define DFS and BFS. Obtain the difference between both. Traverse the following graph using DFS and BFS. Assume the source node is B.  Define DFS and BFS. Obtain the difference between both. Traverse the following graph using DFS and BFS. Assume the source node is B.  Define DFS and BFS. Obtain the difference between both. Traverse the following graph using DFS and BFS. Assume the source node is B.  Define DFS and BFS. Obtain the difference between both. Traverse the following graph using DFS and BFS. Assume the source node is B.  Define DFS and BFS. Obtain the difference between both. Traverse the following graph using DFS and BFS. Assume the source node is B.  Define DFS and BFS. Obtain the difference between both. Traverse the following graph using DFS and BFS. Assume the source node is B.  Define DFS and BFS. Obtain the difference between both. Traverse the following graph using DFS and BFS. Assume the source node is B.  Define DFS and BFS. Assume the source node is B.  Define DFS and BFS. Assume the source node is B.  Define DFS and BFS. Assume the source node is B.  Define DFS and BFS. Assume the source node is B.  Define DFS and BFS. Assume the source node is B.  Define DFS and BFS. Assume the source node is B.  Define DFS and BFS. Assume the source node is B.  Define DFS and BFS. Assume the	V	c.	Write C code snippet to demonstrate application of linked list as stack for implementing push and POP operations.	10	L3	CO3
a. What is binary tree? Write note on threaded binary tree with neat diagram.  b. Construct the binary search tree for the data 27, 5, 36, 47, 19, 250, 21, 44, 6. Perform preorder, Inorder and Postorder traversal for the constructed BST.  OR  Q.8 a. Write a note on Array and linked representation of binary tree.  b. Write recursive function for the following operations on binary search tree: i) Insert key in BST ii) Search key in BST.  Module − 5  Q.9 a. Define DFS and BFS. Obtain the difference between both. Traverse the following graph using DFS and BFS. Assume the source node is B.  Define DFS and BFS. Obtain the difference between both that is a following graph using DFS and BFS. Assume the source node is B.  OR  Q.10 a. What is radix sort? Sort the following numbers using radix sort and show the table of various passes of radix sort. List: 326, 453, 608, 835, 751, 435, 704, 690.  OR  Q.10 a. What is a graph? Explain array representation of graph with neat diagram.  b. What is hash collision? Explain various methods for resolving hash collisions.  c. Implement the hash function h(k) = k% 10 on the numbers: 10, 34, 23, 56, 14, 89, 65, 94, 53, 21, 63, 33. Show the hash table. Resolve hash clashes			Module - 4			
OR  Q.8 a. Write a note on Array and linked representation of binary tree.  b. Write recursive function for the following operations on binary search tree: i) Insert key in BST ii) Search key in BST.  Module - 5  Q.9 a. Define DFS and BFS. Obtain the difference between both. Traverse the following graph using DFS and BFS. Assume the source node is B.  Define DFS and BFS. Obtain the difference between both. Traverse the following graph using DFS and BFS. Assume the source node is B.  D. What is radix sort? Sort the following numbers using radix sort and show the table of various passes of radix sort. List: 326, 453, 608, 835, 751, 435, 704, 690.  Q.10 a. What is a graph? Explain array representation of graph with neat diagram.  D. What is hash collision? Explain various methods for resolving hash collisions.  c. Implement the hash function h(k) = k% 10 on the numbers: 10, 34, 23, 56, 10 L3 14, 89, 65, 94, 53, 21, 63, 33. Show the hash table. Resolve hash clashes	Q.7	a.		10	L2	CO3
Q.8   a.   Write a note on Array and linked representation of binary tree.   8   L3   C		b.	6. Perform preorder, Inorder and Postorder traversal for the constructed BST.	10	L3	CO4
b. Write recursive function for the following operations on binary search tree:  i) Insert key in BST ii) Search key in BST.  Module – 5  Q.9 a. Define DFS and BFS. Obtain the difference between both. Traverse the following graph using DFS and BFS. Assume the source node is B.  b. What is radix sort? Sort the following numbers using radix sort and show the table of various passes of radix sort. List: 326, 453, 608, 835, 751, 435, 704, 690.  OR  Q.10 a. What is a graph? Explain array representation of graph with neat diagram.  b. What is hash collision? Explain various methods for resolving hash collisions.  c. Implement the hash function h(k) = k% 10 on the numbers: 10, 34, 23, 56, 10 L3  14, 89, 65, 94, 53, 21, 63, 33. Show the hash table. Resolve hash clashes						000
Module – 5  Q.9 a. Define DFS and BFS. Obtain the difference between both. Traverse the following graph using DFS and BFS. Assume the source node is B.  B. What is radix sort? Sort the following numbers using radix sort and show the table of various passes of radix sort. List: 326, 453, 608, 835, 751, 435, 704, 690.  OR  Q.10 a. What is a graph? Explain array representation of graph with neat diagram.  b. What is hash collision? Explain various methods for resolving hash collisions.  c. Implement the hash function h(k) = k% 10 on the numbers: 10, 34, 23, 56, 10 L3  14, 89, 65, 94, 53, 21, 63, 33. Show the hash table. Resolve hash clashes	Q.8	a.	Write a note on Array and linked representation of binary tree.	8	L3	CO3
<ul> <li>Q.9 a. Define DFS and BFS. Obtain the difference between both. Traverse the following graph using DFS and BFS. Assume the source node is B.</li> <li>b. What is radix sort? Sort the following numbers using radix sort and show the table of various passes of radix sort. List: 326, 453, 608, 835, 751, 435, 704, 690.</li> <li>Q.10 a. What is a graph? Explain array representation of graph with neat diagram.</li> <li>b. What is hash collision? Explain various methods for resolving hash collisions.</li> <li>c. Implement the hash function h(k) = k% 10 on the numbers: 10, 34, 23, 56, 14, 89, 65, 94, 53, 21, 63, 33. Show the hash table. Resolve hash clashes</li> </ul>		b.		12	L3	CO3
A Define DFS and BFS. Obtain the difference between both. Traverse the following graph using DFS and BFS. Assume the source node is B.  B. What is radix sort? Sort the following numbers using radix sort and show the table of various passes of radix sort. List: 326, 453, 608, 835, 751, 435, 704, 690.  CR  Q.10 a. What is a graph? Explain array representation of graph with neat diagram.  B. What is hash collision? Explain various methods for resolving hash collisions.  C. Implement the hash function h(k) = k% 10 on the numbers: 10, 34, 23, 56, 14, 89, 65, 94, 53, 21, 63, 33. Show the hash table. Resolve hash clashes			Module – 5			
the table of various passes of radix sort. List: 326, 453, 608, 835, 751, 435, 704, 690.  OR  Q.10 a. What is a graph? Explain array representation of graph with neat diagram.  b. What is hash collision? Explain various methods for resolving hash collisions.  c. Implement the hash function h(k) = k% 10 on the numbers: 10, 34, 23, 56, 10 L3 14, 89, 65, 94, 53, 21, 63, 33. Show the hash table. Resolve hash clashes	Q.9	a.	following graph using DFS and BFS. Assume the source node is B.	10	LS	CO4
<ul> <li>Q.10 a. What is a graph? Explain array representation of graph with neat diagram.</li> <li>b. What is hash collision? Explain various methods for resolving hash collisions.</li> <li>c. Implement the hash function h(k) = k% 10 on the numbers: 10, 34, 23, 56, 14, 89, 65, 94, 53, 21, 63, 33. Show the hash table. Resolve hash clashes</li> </ul>		b.	the table of various passes of radix sort. List: 326, 453, 608, 835, 751, 435, 704, 690.	10	L3	CO4
<ul> <li>b. What is hash collision? Explain various methods for resolving hash collisions.</li> <li>c. Implement the hash function h(k) = k% 10 on the numbers: 10, 34, 23, 56, 14, 89, 65, 94, 53, 21, 63, 33. Show the hash table. Resolve hash clashes</li> </ul>				-1		
c. Implement the hash function h(k) = k% 10 on the numbers: 10, 34, 23, 56, 14, 89, 65, 94, 53, 21, 63, 33. Show the hash table. Resolve hash clashes	Q.10	1			L2	CO <sub>2</sub>
14, 89, 65, 94, 53, 21, 63, 33. Show the hash table. Resolve hash clashes		b.		6	L2	CO
		c.	14, 89, 65, 94, 53, 21, 63, 33. Show the hash table. Resolve hash clashes	, 10	L3	CO
