

**22MBA24** 

## Second Semester MBA Degree Examination, June/July 2023 Operations Research

Time: 3 hrs.

Max. Marks: 100

Note: 1. Answer any FOUR full questions from Q.No.1 to Q.No.7.

2. Question No. 8 is compulsory.

3. Calculators are allowed. Use of Z-table is permitted.

4. M: Marks, L: Bloom's level, C: Course outcomes.

		23	M	L	C
Q.1	a.	What is Operations Research?	3	L1	CO1
	b.	A manufacturer produces two models $M_1$ and $M_2$ of a product. Each unit of model $M_1$ requires 4 hrs of grinding and 2 hrs of polishing. Each unit of model $M_2$ requires 2 hrs of grinding and 5 hrs of polishing. The manufacturer has 2 grinders each of which works for 40 hrs a week. There are 3 polishers each of which works for 60 hrs per week. Profit of model $M_1$ is Rs.300 per unit and profit of model $M_2$ is Rs.400 per unit. The manufacturer has to allocate his production capacity so as to maximize his profit. Formulate LPP.	7	L3	CO2
	c.	A foreman wants to process four different jobs on 3 machines: a shaping machine, a drilling machine and tapping machine. The sequence of the operations being shaping-drilling-tapping. Decide the optimal sequence for the four jobs to minimize the time elapsed and find the total idle time. The processing time in minutes is as given in the table.    Jobs   Machines   Shaping   Drilling   Tapping	10	L2	CO3
Q.2	a.	What are the applications of LPP in management?	3	L1	CO1
	b.	Enumerate on the scope of operation research.	7	L2	CO1
	c.	Solve the following transportation problem to maximize the profit by least cost method.           Destination           A         B         C         D         Supply           1         15         51         42         33         23           2         80         42         26         81         44           3         90         40         66         60         33           Demand         23         31         16         30	10	L3	CO2
Q.3	a.	What is an Assignment problem?	3	L1	CO2
				I	

1	b.	For the following pay-off matrix of Company A, find the solution	7	L2	CO3
		game by principle of dominance.  Company Y			
		Company X P Q R S A 6 -2 4 1 B 6 1 12 3 C -3 -2 -2 6 D 2 -3 7 7			
			10	T.0	CO2
	c.	Use graphical method to solve the following LFF:  Min $z = 20x + 10y$ Subject to constraints: $x + 2y \le 40$ $3x + y \ge 30$ $4x + 3y \ge 60$	10	L3	CO2
		where $x, y \ge 0$	3	L1	CO4
2.4	a.	What do you understand by "work-break down" structure?	7	L2	CO4
	b.	Enumerate on the differences between PERT and CPM.	10	L3	CO2
	c.	Solve the travelling salesman problem by using the data given: $C_{12} = 20$ , $C_{13} = 4$ , $C_{14} = 10$ , $C_{23} = 5$ , $C_{34} = 6$ , $C_{25} = 10$ , $C_{33} = 6$ , $C_{45} = 20$ , where $C_{ij} = C_{ji}$ and there is no route between cities i and j if a value of $C_{ij}$ is			es 2
		not known.	3	L1	CO
Q.5	a.	What is 'Project control phase' in project management?  Enumerate on the different criteria of decision making under uncertainty.	7	L2	CO
	b	The precedence relation and other information are given in the table below,	10	L4	CO
	C.	(i) Draw a network diagram to represent the project.  (ii) Find the critical path.  (iii) Find the total floats available on non-critical activities.  Sl. No. Activity Predecessor Duration (Days)  1 A - 7  2 B - 13  3 C A 10  4 D A 17			
		5 E B 3 6 F D, E 26			4 66
Q.6		. Why is job sequencing important?	3		
	8	Briefly explain the steps involved in decision-making process.			2 CC
	_	Solve the following game graphically, Player B	1	0 I	.4 CC
		Player A 1 2 3 4 5 1 -5 5 0 -1 8 2 8 -4 -1 6 -5			2

2.7	a.	What is Dege	neracy in t	ransportation	n problem?			3	L2	CO2
		Solve the assi				AV		7	L3	CO <sub>3</sub>
