## **ABSTRACT**

The proposed thesis aims to address the challenges that cancer patients encounter by exploring the intricate relationship between the architectural environment and the healing process. Cancer is a complex medical condition that not only affects patients physically but also takes a toll on their spiritual, psychological, and social well-being. Recognizing the holistic nature of the struggles faced by individuals dealing with cancer, the project seeks to develop a comprehensive solution to enhance their overall quality of life.

In summary, the thesis aims to pioneer an integrated approach that combines architectural design with healthcare, creating environments that contribute positively to the healing journey of cancer patients. The tailored care and research centers, along with a focus on collaborative relationships, are envisioned to make meaningful contributions to the field of cancer care.

## DECLARATION

This thesis title “CANCER REHABILITATION CENTRE”, submitted in partial fulfillment of the requirement for the award of the under graduate of Bachelor of architecture is my original work to the best of my knowledge.

The sources for the various information and the data used have been duly acknowledged.

The work has not been submitted or provided to any other institution/ organization for any diploma/degree or any other purpose.

I take full responsibility for the content in this report and in the event of any conflict or dispute if any, hereby indemnify Acharya’s NRV School of Architecture and Visveshwaraya Technological University, Belagavi, and its official representatives against any damages that any raise thereof.

**Harsh Vivek**

## **ACKNOWLEDGEMENT**

I would like to express my sincere gratitude and appreciation to my thesis advisor, Ar. Gayathri S Pillai, for their invaluable guidance, mentorship, and unwavering support throughout the entire process of this research. Their expertise and encouragement have been instrumental in shaping this work. I am also immensely grateful for the valuable feedback, insightful suggestions, and constructive criticism that significantly enhanced the quality of this thesis. My deepest appreciation goes to my family and friends for their unwavering encouragement, understanding, and support during this demanding yet rewarding journey. Last but not least, I want to acknowledge those who have supported and believed in me, your contributions have been integral to the successful completion of this architecture thesis. I am sincerely grateful for your involvement in this significant phase of my academic journey.
