ACKNOWLEDGEMENT

I would like to express my sincere gratitude and appreciation to the various individuals and entities who have contributed to the completion of this architectural thesis.

First and foremost, I extend my deepest thanks to my thesis advisor, Ar. Gayathri S Pillai, for their guidance, encouragement, and invaluable insights throughout the entire research and design process. Their expertise has been instrumental in shaping the direction of this work. I am indebted to the faculty members of the architectural department for their support and constructive feedback during the review process. Their commitment to academic excellence has been a constant source of inspiration.

Special thanks are due to my friends and classmates who have provided moral support and valuable discussions. Your encouragement has been a driving force in overcoming challenges and staying motivated.

I would also like to express my appreciation to my family for their unwavering support and understanding throughout this academic journey. Their encouragement has been my anchor in times of uncertainty.

Lastly, I want to acknowledge the individuals and organizations who generously shared their expertise and time during interviews and surveys, contributing valuable insights that enriched the content of this thesis.

Thank you all for being an integral part of this endeavor.
